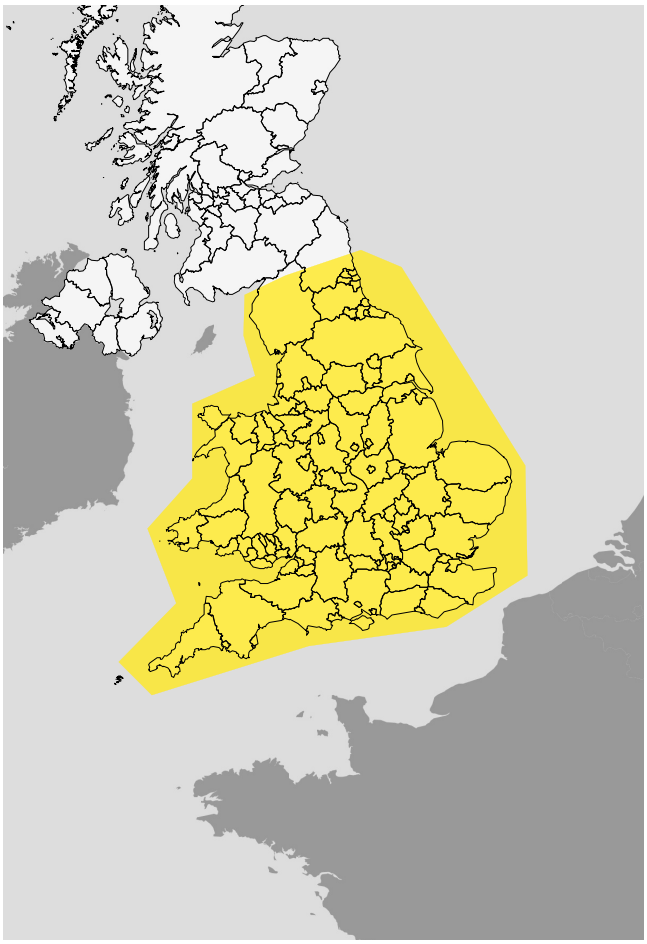
Yellow warning
Wind

Between
09:00 Wed 1 Jan 2025 and
06:00 Thu 2 Jan 2025



Very strong winds expected to lead to some disruption.

What to expect

- There is a small chance of injuries and danger to life from flying debris
- There is a slight chance of some damage to buildings, such as tiles blown from roofs
- There is a small chance of longer journey times or cancellations as road, rail, air and ferry services are affected
- There is a small chance that some roads and bridges could close
- There is a slight chance that power cuts may occur, with the potential to affect other services, such as mobile phone coverage
- There is a small chance that injuries and danger to life could occur from large waves and beach material being thrown onto sea fronts, coastal roads and properties

Yellow warning
Wind

Between
09:00 Wed 1 Jan 2025 and
06:00 Thu 2 Jan 2025

Further details

A deep area of low pressure is expected to cross the UK from the west, bringing a spell of very strong winds. Gusts of 65-75 mph are likely around coasts and hills, especially in the south and west, with 50-60 mph gusts likely fairly widely inland.

What should I do?

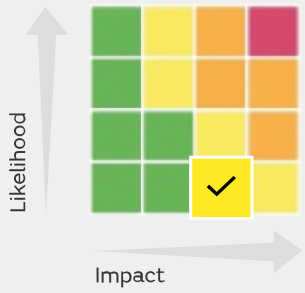
Prepare to protect your property and people from injury. Check for loose items outside your home and plan how you could secure them. Items include; bins, garden furniture, trampolines, tents, sheds, and fences.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you are on the coast, stay safe during stormy weather by being aware of large waves. Even from the shore large breaking waves can sweep you off your feet and out to sea. Take care if walking near cliffs; know your route and keep dogs on a lead. In an emergency, call 999 and ask for the Coastguard.

Be prepared for weather warnings to change quickly. When a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.



Very low likelihood of medium impacts
